

HAMMERHEAD CT-7

Easy One-hand Operation

The Hayata Hammerhead CT-7 manual ratchet tool is designed to make stainless steel cable tie installations more efficient and tooling investments last longer. Hammerhead is Hayata-strong, designed for heavy-duty use and abuse in hard to access areas.

Flat heavy-duty
"Hammerhead" nose
can be used to hammer
down cable tie head
or tail if required

Lightweight design
reduces installer fatigue.

Easy to load.
Easy material
removal.

Heavy-duty
zinc-plated construction
for maximum corrosion
resistance

Hammerhead CT-7 Operating Instructions

Lightweight design
reduces installer fatigue.

Easy to load. Easy material removal.

Place band in position and hand tighten as much as possible.

Position the CT-7 in loading position (ratchet handle forward) then place the band through Tool Nose and Winding Mandrel. Make sure there is plenty of band through the Mandrel.

Grip Ratchet Handle and pull back toward Handle to tighten band.

Repeat this action until band is at desired tightness.

When desired level of band tightness is achieved, Tool Nose is flush with head.

With a firm grip on the CT-7, grasp Cutter Handle with other hand.

Push forward the Cutter Handle to trim the band.

This band is installed. Discard leftover band material and move on to the next install!

Hayata, an ISO 9001:2015 company, offers the largest selection of stainless steel ties, banding, and tags.
