

The strongest around.™

MARK IT. TAG IT. TRACK IT.

Email Your Tag Data

We'll emboss and ship your tags within 24 hours*

If your marker implementation plan requires customized tags, we have a simple solution.

1. Email us your data
2. Select tag number
3. We emboss your tags
4. We ship your tags within 24 hours*

No more tedious manual outputting of tags and no money tied up in tag inventory.

Need barcoded marker tags? NO PROBLEM!

* 24 hour shipping means next business day (stocked tags)

Embossed tags are your best bet for easy, long-term identification.

Embossed stainless steel tags can be read long-term no matter how harsh the operating conditions. This is why the military uses embossing on dog tags.

Stamped tag character channels get filled in with dirt and grime and are difficult to clean out.

Silk screened tags are easily scratched and eventually fade or peel off.

If stamped or silk-screened tags are accidentally hit with paint by careless workers, they become illegible.
