The strongest around.™

BT-200

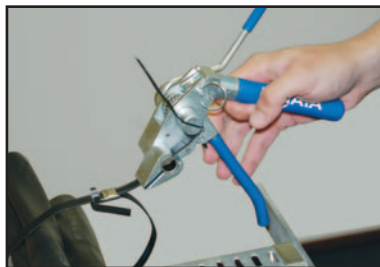

MANUAL BANDING
INSTALLATION TOOL

BT-200 Operating Instructions

Position the BT-200 in loading position (ratchet handle forward) then place the band through Tool Nose and Winding Mandrel. Make sure there is plenty of band through the Mandrel.

Grip Ratchet Handle and pull back toward Handle to tighten band. Repeat this action until band is at desired tightness.

Note: For straight or angled position bands, use two hands for ratcheting action.

Push forward the Cutter Handle to trim the band.

When desired level of band tightness is achieved, Tool Nose is flush with latch.

Roll the BT-200 forward as far as it will go.

Press band tab into latch.

Tap down latch ears. This band is secure.
Remove excess banding from Mandrel.

*Hayata, an ISO 9001 company,
offers the largest selection
of stainless steel ties,
banding, and tags.*
