

Coated Stainless Steel Center Punch Bands

Hayata's highly durable coated stainless steel Center Punch Bands are designed to withstand extreme weather and temperature conditions, corrosion, physical force, chemicals and UV.

Hayata's stainless steel Center Punch bands are fully coated, which makes the banding application safer by preventing injuries associated with handling. Available in 13 colors and uncoated, Hayata Center Punch bands resist fading and corrosion due to extreme weather/temperature environments.

With Hayata's superior quality and rugged design, our coated stainless steel bands are the perfect option for Fracturing ID Recertification operations and will out perform all other bands available in the Oil & Gas industry.

**Highly Durable
Stainless Steel Band**

**MADE IN
USA**

Color I.D.

Durable, robust coating to withstand harsh environments.
13 colors plus uncoated stainless steel.

**Superior Buckle Design
Delivers Higher
Tensile Strength**

Fully Coated Band

Safer band application/handling by preventing hand & arm injuries.

- Safer and Easier handling & band installation vs. bands that are not fully-coated
- Fully-coated bands reduce banding time and labor costs
- High tensile strength exceeds oil and gas industry standards
- Visual Identification for: FRAC ID RECERTIFICATION, asset management and downhole applications
