Easy-Entry™ TAGS
applied to cable, valves
and enclosures

Coated stainless steel
TIES AND BANDING
applied to vertical and
horizontal wiring bundle
applications

Stainless steel and
Monel® BANDING
applied to pier pilings
and strakes

Why Hayata?

- First to introduce fully coated stainless steel cable ties.
- Highest Tensile Strengths in the industry for coated ties (the Strongest Around!).
- Offered in a wide variety of colors for easy identification.
- New EZID Ties (for inspectors to identify the ties) are made of SS (uncoated heads).

Hayata Coated Cable Ties & Banding Features

- Fully coated ties - including the head
- Higher tie tensile strength compared to other brands (per UL62275)
- Anti-vibration
- Salt-spray resistant
- UV resistant
- Low Smoke
- Halogen-Free
- Corrosion resistant
- Extreme temperatures
- Prevents dissimilar metal corrosion
- Long-term bundling
- Strengthens physical infrastructure for harsh environments
- Edge Protections with rounded edges

The strongest around.™

Coated Stainless Steel

CABLE TIES

Sizes range from 3/16" (4.6mm) to 5/8" (15mm).

Tensile loads of 200, 300, 425 and 500 lbs.

Hayata delivers high strength and reliability in the harshest, most corrosive environments.

Hayata introduced the first fully coated tie into the market place in 2005. While other brands copied this, no one has equaled our ties performance.

Hayata's Tensile Strengths on Coated Ties exceeds that of all competitors per UL62275.

These ties are ready to secure products in the harshest environments of todays oil & gas, shipbuilding and petro chemical industries.

Today, we continue to **coat the entire tie** as our standard, including the head, because corrosion does not only attack the strap. If there is an engineering requirement for special colors or coating requirements, please contact us as we offer full line of colors including red, blue, green, yellow and white

Hayata banding holds tight in the harshest offshore environments

Coated Stainless Steel

BANDING

Independent lab (ASTM E8-04) reports prove Hayata's stainless steel banding is the strongest in the industry.

Available in widths ranging from 1/4" (7mm) to 5/8" (15.8mm).

Wide range of stainless steel grades, lengths and buckle type to match your application.

NEW!

EZID TIES

EZID ties come with an uncoated head and a coated tie strap. Add -EZID to the end of a coated tie's part number to make it an EZID tie. *Example:* TBC1000C-EZID

COATED CABLE MARKING TIES

Hayata's highly durable coated stainless steel cable ties are a great option for high-volume marking and maintenance operations. These fully coated ties resist fading due to weather and harsh environments.

- Fully coated ties - including the head
- Corrosion resistant
- Prevents dissimilar metal corrosion
- Edge Protections with rounded edges
- ABS Type Approval
- Salt-spray resistant
- UV resistant
- Low Smoke
- Halogen-Free

NOTE: Add color suffix to any coated tie product (see previous page) to get the color and size tie you require. *Example: TBC100C-YW*
