

CONTINUOUS ROLL 316 STAINLESS STEEL CABLE TIES

Hayata's continuous roll stainless steel cable ties are for applications that require various cut-to-length sizes on the job. This allows the operator to pull the required tie length and cut based on specified bundle size.

Heads are then easily slipped on to complete the tie.

- 225 Lb. & 475 Lb. tensile strength, are stocked.
- If you need stronger ties (525 Lb. or 1,000 Lb.) for your application, please call for minimum requirements.
