

DotMark Pro™ 1000 PORTABLE DOT PEEN MARKING MACHINE

The **Hayata DotMark Pro 1000** is a portable, battery-powered dot peen engraving unit that allows you to permanently add numbers, text and logos on marking bands or other metal objects in the field.

The unit is lightweight, accurate and easy to use for product traceability and regulatory compliance.

FEATURES & BENEFITS

- More flexibility for your marking operation – no more dependence on table top engravers
- Provides sharp, accurate markings – including complex designs
- Intuitive touch screen
- Easy to maintain and operate – minimal training required
- Battery powered for maximum portability – can operate continuously up to 4 hours between charges
- Deep engraving – from .05 mm to .5 mm – for effective long-term identification
